MATHS

Design and create a 3D physical model representing the Number System of any one ancient civilization (e.g., Egyptian, Babylonian, Mayan, Roman, or Indus Valley). Your model should clearly demonstrate how they represented basic numbers and how their system functioned.

Instructions:

Choose a Civilization: Pick one civilization that interests you. Research their numerical symbols and their base system (for example, was it Base 10 like ours, Base 60, or Base 20?).

The Model: Use eco-friendly or household materials (cardboard, clay, beads, stones, or recycled wood) to create a visual representation of their numbers.

Worksheet on Chapter 1-4.

Students must paste the worksheets in the homework notebook.

SCIENCE

1. List **Five Major Cyclones** which have occurred in the **World** in last **Five Years**. List two major destructions caused by each of the cyclones. Mention two suggestions you would like to propose to the Local Government.

Note: Write the above observations in your science notebook.

2. Complete all the exercises, learn and prepare well for Periodic Test-I.

SOCIAL SCIENCE

CIVICS
